LX series

AIR CONDITIONERS & HEAT PUMPS

Life is always better when you have choices. That's what makes your home so unique and cozy. That's also why millions of families have turned to York to keep their homes comfortable. Because York offers choices. With our LX Series Split System Air Conditioners and Heat Pumps, you can choose from a full line of heating and cooling options that deliver dependable performance while meeting the new requirements for energy efficiency. Which can ultimately save you money. And because each LX Series unit is built by York—the industry leader in innovative design—you know your home will stay comfortable for years to come.

LX Series Heat Pumps

A heat pump may be a more cost-efficient choice if you live in a region with mild winters. These all-in-one designs cool your home in the summer as an air conditioner would. In winter, the operation is reversed, and your home's interior is heated and comfortable, even on the chilliest days.

LX Series Air Conditioners

With several affordable designs to choose from, it's easy to find the model that will keep your home cool, control humidity and maintain indoor air quality, even on summer's hottest days. LX Series models include enhanced coil protection for superior durability. LX Series models are also available with a choice of environmentally friendly R410A refrigerant or R22—and use less of it!

LX Series Heat Pump

LX Series 13 SEER Heat Pump

- Meets strict government 13 SEER criteria and operates 30% more efficiently than previous 10 SEER standards
- Exceptionally quiet sound levels
- Streamlined appearance includes stamped coil guard that protects the unit from debris
- Solid core filter-drier protects the efficient compressor
- Enclosed, permanently lubricated fan motor reduces maintenance costs
- Environmentally friendly refrigerant
- Coils are constructed of copper tubes and aluminum fins, ensuring efficient operation and durability
- Easy to clean, service and repair

LX Series Air Conditioners

LX Series 13 SEER Air Conditioner

- Meets strict government 13 SEER criteria and operates 30% more efficiently than previous 10 SEER standards
- Exceptionally quiet sound levels
- Streamlined appearance includes stamped coil guard that protects the unit from debris
- Compact design requires less space
- Solid core filter-drier protects the efficient compressor
- Enclosed, permanently lubricated fan motor reduces maintenance costs
- Available with environmentally friendly refrigerant
- Microchannel aluminum coil technology provides superior durability, efficient operation and greater corrosion resistance
- Easy to clean, service and repair

LX Series 14.5 SEER Air Conditioner

- ENERGY STAR® rated and meets strict government guidelines for protecting the environment
- Swept wing fan design reduces sound to a whisper
- Streamlined appearance includes stamped coil guard that protects the unit from debris
- Compact design requires less space
- Solid core filter-drier protects the efficient compressor
- Enclosed, permanently lubricated fan motor reduces maintenance costs
- Environmentally friendly refrigerant
- Microchannel aluminum coil technology provides superior durability, efficient operation and greater corrosion resistance
- Easy to clean, service and repair
- Ratings up to 15+ SEER when matched with a variable-speed indoor blower

BEING SMALL HAS NEVER BEEN THIS COOL.

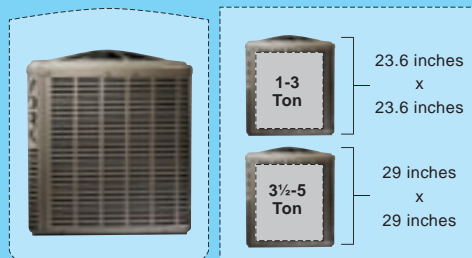

LX Series Air Conditioner

- Compact size requires less space and can also mean an easier, less costly installation
- Microchannel aluminum coil technology provides superior durability and has up to seven times greater corrosion resistance versus conventional coil technologies
- Ideal for coastal applications
- Easy to clean, service and repair
- Available with environmentally friendly R410A refrigerant or R22 (and uses less of it)
- Pleasing sound levels
- Compressors are protected against high pressure and temperature
- Dual coil guard system provides superior protection while rigid corner posts increase cabinet strength
- Durable, appliance-quality finish

Less can be so much more.

The [mc]² has the smallest footprint of any unit with a 13 SEER rating. When replacing older units, you can save time and money, since you can reuse your existing pad. Less space required outside, more cooling capacity inside. Trust the [mc]² to keep costs and temperatures down.

How to stay comfortable for years to come.

York and your York Dealer are proud to offer the YorkCare™ Comfort Plan. It's designed to maintain your system as well as your peace of mind. With up to 10 years of total coverage available, you can ensure your unit is effective and efficient for years to come.

What's more, your York Dealer offers maintenance agreements that provide upkeep while maximizing the warranty provisions.

Ask about the YorkCare Comfort Plan. A little extra coverage is always a comforting idea.

Long story short: the history of York design.

You've probably enjoyed York engineering for years without even knowing it. We have, after all, designed and implemented heating

and cooling systems in some the world's most famous structures, including the U.S. Capitol

building, India's Taj Mahal, the Sydney Opera House, the entire U.S. Navy

nuclear submarine fleet, and even venues such as your local mall and corner bank.

■ There's a reason people trust us

with the big jobs. We've been doing this a long time. Over 130

years, in fact. In that time, we developed the first successful room air conditioner and cooled the world's first theater, hotel and office building.

We're constantly leading the industry in our design and our technology. And our commitment has earned our products the

Good Housekeeping Seal of Approval. No matter what the scale, chances are we've developed an efficient, durable and effective solution for it.

■ Which is all a way of saying this: You can depend on York to give you the choices you're looking for and

the designs that will keep you comfortable year-round, year after year.

■ Want to know more? Contact your York Dealer. They have 130 years of innovation to tell you about.
